

ONLINE IMMUNIZATION REPORTING

You now have the option to submit your child's immunization information 24-7 online, using our secure, online immunization portal ICON (Immunization Connect).

Follow the steps below to report immunizations to the Health Unit

- 1) www.huronhealthunit.ca/ICON
- 2) Click: "Report or access your immunization information online"
- 3) Report Immunizations

When reporting immunizations through our website please have the following documents ready:

- Health Card

- A photo or scanned copy of the immunization record to upload with your submission

Please note that entry of immunization information to attend child care is outside the current scope of consent for ICON and in order for the Health Unit to process your information entered on ICON, we require your express consent.

When you register for ICON, please check the "I received a letter from the Health Unit" box when submitting.

When you provide your express consent, you allow the Health Unit to collect and electronically store your child's immunization information so that your child may attend child care. You also consent to healthcare providers accessing this information if necessary.

Storing your child's immunization information on ICON means that you can view your child's immunization record anytime at huronhealthunit.ca/ICON.
